

ANIRUDH BATTU

Software Engineer

anirudhbattu2006@gmail.com | +91 7013110190

Aspiring Software Engineer | Full-Stack Developer | Problem Solver Passionate and motivated Computer Science Engineering student with strong foundations in Java, Python, and modern web technologies. Experienced in building responsive and scalable applications using React, Spring Boot, and MySQL. Skilled in developing user-focused solutions, with hands-on project experience in healthcare systems and portfolio development. Enthusiastic about learning emerging technologies, contributing to innovative projects, and growing in collaborative and fast-paced environments.

EDUCATION

Anurag University

B.Tech in Computer Science and Engineering

CGPA: 7.00 / 10

Hyderabad, Telangana

2023 – 2027

Sri Chaitanya Junior College

Intermediate (MPC)

Percentage: 90.7%

Hyderabad, Telangana

2021 – 2023

SKILLS

Languages:	Java, Python , JavaScript, TypeScript, C, SQL
Frameworks:	Flutter , REST APIs, React, Next.js, Node.js, Express, FastAPI
Cloud & DevOps:	AWS (Lambda, SQS, S3, EC2), Azure (VMs), Docker, CI/CD, Linux
Databases:	PostgreSQL , MySQL, MongoDB, Neo4j
Data & AI:	RAG pipelines, Vector search, Knowledge Graphs, OpenAI APIs
Core Concepts:	Data Structures, Algorithms, OOP, System Design, DBMS, Operating Systems
Tools & Methods:	Git, Agile, SDLC, Testing, Debugging, GitHub Actions

PROJECTS

Smart Appointment and Queue Management System

Java, Spring Boot, MySQL, React

- Built a full-stack hospital management system with Spring Boot REST APIs and MySQL, supporting patient appointment booking, automatic token generation, and real-time queue management.
- Implemented role-based dashboards for patients, doctors, and admins with appointment status tracking (WAITING/COMPLETED) and CRUD operations via RESTful endpoints.

AI-Driven Customer Feedback Analyzer

FastAPI, React, PostgreSQL, Docker

- Built an AI platform for customer feedback analysis using sentiment, emotion, and topic clustering aligned with client requirements. Developed FastAPI backend, React dashboard, and pgvector embeddings with Redis and Celery for scalable processing following SDLC.

DropBeam | Cross-Platform File Transfer System

React Native, Tauri

- Built a **custom TCP-based file transfer system** with chunked streaming and strong encryption to enable fast, reliable, and secure data transfer without relying on traditional web protocols.
- Developed **offline device pairing and USB-based communication** to allow seamless, cross-platform file sharing without requiring an internet connection.

CERTIFICATIONS & ACHIEVEMENTS

- Learn AI and Gen AI Basics – **Microsoft**
- JavaScript Essentials 1 – **Cisco Networking Academy**
- Database and SQL – **Infosys Springboard**
- Java Programming Fundamentals – **Infosys Springboard**
- Networking Essentials – **Cisco Networking Academy**
- Operating Systems Basics – **Cisco Networking Academy**
- Machine Learning – **NPTEL**
